7th SOCLE DU MONDE

Concept by Tijs Visser with Maria Finders

Arranged by Daniel Birnbaum, Jean Hubert Martin, Holger Reenberg,

Olivier Varenne and Tijs Visser

AN EXPERIMENTAL EXHIBITION TO CHALLENGE THE EARTH, THE MOON, THE SUN & THE STARS -- which unfolds as a constellation of dialogues between 60 artists, in 7 chapters from, with and around one centre of gravity, Piero Manzoni, who had decided to declare Herning as centre of the world.

By its natural forces, the Socle du Monde sets in motion the universal laws of attraction and repulsion, pushing and pulling each of the contributions and actions into a magnetic field; composing a narrative that binds simple concepts – identity, spirit, light, body, faces, space, time, birth, and earth, that compose the Manzoni cosmology - to a complex environment of the historical and the avant-garde. Taking into account the utopian potential of the site in Herning with its specific architecture and parcs, the exhibition permits the visitor to explore a special dialogue with nature and culture which is unique in Europe.
